

Geosynthetic Industry Leader Carthage Mills is Acquired by Kaye William & Company – Expanding Product Offerings & Continuing Growth

July 15, 2022

Cincinnati, Ohio based [Carthage Mills](#) – *the global supplier and pioneer of the geosynthetics industry, dating back to 1958* – has recently been acquired by Kaye William & Company of St. Louis, MO. Carthage Mills is a recognized leader in offering one of the most comprehensive lines of geosynthetic and erosion control products in the industry. Their branded products are available via a network of distributors located throughout the United States and internationally.

Carthage Mills' geosynthetic products are used for reinforcement, separation, and containment of soil and other materials in various construction and infrastructure projects. These projects are focused on erosion control, roads, environmental, landscaping, drainage, retaining walls, roofing, septic, athletic fields, parking, and equestrian facilities. Additionally, construction site supplies and accessories continue to be added, and they round out a full bundle of products available to Carthage Mills' distributors.

Long-time Vice President and partner of Carthage Mills, Jim Paulsen, commented — *“We are proud to join with Kaye William & Co. and Derek Goodin to expand our offerings, continue our growth with new products, and better serve our network of distributors and partners. We have an experienced solutions-driven team, and we are excited about the future here at Carthage Mills.”*

This transaction represents Kaye William's initial investment in the specialty distribution and manufacturing channels with additional investments forthcoming.
