Subject: Build America, Buy America (BABA) Requirements
 Classification of Carthage Mills geosynthetics

Dear Valued Partner,

On November 15, 2021, President Joseph R. Biden Jr. signed into law the Infrastructure Investment and Jobs Act ("IIJA"), Pub. L. No. 117-58, which includes the Build America, Buy America Act ("the Act"). Pub. L. No. 117-58, §§ 70901-52. The Act strengthens Made in America Laws and will bolster America's industrial base, protect national security, and support high-paying jobs. The Act required that no later than May 14, 2022—180 days after the enactment of the IIJA—the head of each covered Federal agency shall ensure that *“none of the funds made available for a Federal financial assistance program for infrastructure, including each deficient program, may be obligated for a project unless all of the iron, steel, manufactured products, and construction materials used in the project are produced in the United States.”* (Build America, Buy America Act, P.L. 117-58, Secs 70911 – 70917).

Based on the information outlined, most all geosynthetics classify as a “Construction Material” since they are made primarily of polymer-based products. The following materials meet the Build America, Buy America Act, Pub. L. No. 117-58, div. G §§ 70901-52 if the BIL.

As the leading domestic manufacturer of geosynthetic materials, Carthage Mills is well positioned to meet the requirements of BABA. We look forward to working with our valued customers to meet the market demands. Please continue to stay in close communication with your sales contacts during this time.

Thank you for your continued business and commitment to the geosynthetic market.

Sincerely,
Carthage Mills

Jim Paulsen
Vice President of Carthage Mills
